

**Seatpost range:**

The Vault features a low stand-over height and short seat tubes to allow the use of longer travel dropper posts and/or more flexibility for a wider range of rider sizes.

There are some limitations that each dropper post can accommodate for each frame size based on the individual riders saddle height, so it is important to check fit before choosing the travel and model of dropper post for your Vault.

**Find your saddle height:**

1. On a current bike with the seat at max height (basically your XC saddle height), measure from the center of the crank spindle to the top of the seat (the “X” measurement in the illustration).
2. Choose your Vault frame size.
3. Based on your frame size selection, you can review the chart below to select the longest travel post that you are able to run. Your saddle height needs to fall in between the “Minimum” and “Maximum” saddle height measurements listed on the chart. For instance, if you want to run a 125mm FOX Transfer post on a medium Vault and your saddle height does not fall between 78.2cm (30.8”) and 90.3cm (35.5”) then you need to order the 100mm post instead. The Vaults will ship with a 27.2mm rigid post, however, using the Iso Flex system, the seat tube insert can be swapped out to accept a 30.9mm dropper post. Additional information on using the Iso Flex seat tube insert can be found on the Technical Documents page of the Vault.
