Seatpost range:
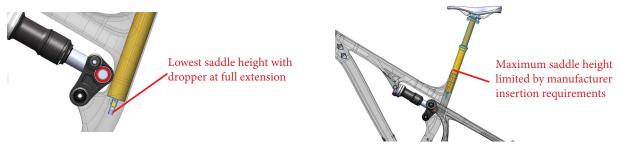

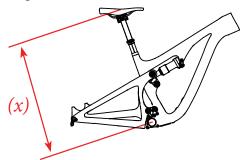

The Mach 5.5c features a low stand-over height and short seat tubes to allow the use of longer travel dropper posts and/or more flexibility for a wider range of rider sizes.

There are some limitations that each dropper post can accommodate for each frame size based on the individual riders saddle height, so it is important to check fit before choosing the travel and model of dropper post for your Mach 5.5c.

Lowest saddle height with dropper at full extension

Maximum saddle height limited by manufacturer insertion requirements

Find your saddle height:

1. On a current bike with the seat at max height (basically your XC saddle height), measure from the center of the crank spindle to the top of the seat (the "*x*" measurement in the illustration).

2. Choose your Mach 5.5c frame size.

3. Based on your frame size selection, you can review the chart below to select the longest travel post that you are able to run. Your saddle height needs to fall in between the "Minimum" and "Maximum" saddle height measurements listed on the chart. For instance, if you want to run a 150mm FOX Transfer post on a medium Mach 5.5 C and your saddle height does not fall between 72.9cm (28.7") and 83.1cm (32.8") then you need to order the 125mm post instead. For the Mach 5.5c dropper availability, the XS and S frames can ship with the KS 100mm or FOX Transfer 125mm dropper. All other sizes will ship with the FOX Transfer 125mm or 150mm dropper.
